EXECUTIVE SUMMARY

Results-driven AI & Data leader specializing in enterprise AI strategy, Agentic AI product development, and data-driven transformation in financial services, advisory and regulated industries. Heading KPMG Advisory's AI and Data practice, driving AI-First strategies that boosted AI adoption by 40%+, generated \$15M+ in client revenue, and driven 20-25% efficiency at scale. Deep hands-on expertise in Gen AI, Agentic AI, LLMops, AI Governance, and Azure data services. Proven building high-performing global teams, C-Suite partnerships, and transitioning prototype to production-scale, cloud-agnostic products that deliver measurable outcomes. Seeking a new role to accelerate and manage enterprise AI transformation. Consistent Learner.

CORE COMPETENCIES

- | | | |
|--|---|---|
| ■ AI/GenAI/Agentic AI Strategy, Roadmap & Vision. Innovation | ■ AI Enablement & AI Native Development | ■ AI Product Development (0 → 1 → Scale), FDE |
| ■ C-Suite Advisory & Stakeholder Management | ■ AI Governance (EU AI Act, NIST AI RMF); AI Native Software Delivery | ■ Rapid Prototyping & POC-to-Production; LLMops, DevOps |
| ■ RAG, LLM, VLM & Embedding Models | ■ Cross-Functional Team Leadership | ■ Azure AI Foundry & Data Engineering |
| ■ Risk Management & Compliance | ■ Financial Services Domain Expertise | ■ Customer/Client Engagement |

PROFESSIONAL EXPERIENCE

KPMG US (Advisory)

Head — Applied AI & Data, Engineering | Hybrid / NJ | September 2022 – Present

Strategic AI Leadership, AI Enablement & Business Impact

- **AI-First Strategy:** Prepared and implemented an AI-First policy across KPMG Advisory, improving AI adoption by 40%+. Defined AI vision, strategy, and multi-year roadmap for both KPMG Advisory and clients – aligning with the business.
- **AI Business Transformation:** Proven business transformation with strong agentic AI expertise. KPMG differentiator. Generated new businesses by identifying new AI projects and opportunities. Customer/Client Obsession development.
- **C-Suite Partnerships & Growth:** Established partnerships with CTOs/CIOs, and C-Suite executives, improving clients' top-line revenue growth and bottom-line operational performance. Improved KPMG technological capabilities.
- **GTM and Revenue Generation:** Own pipeline and booking targets for AI services. Work with Sales/Marketing and alliances.
- **Cross-functional Partnerships:** Established cross-functional partnerships with teams: product, data, devOps, risk/compliance to create best practices and deliver the best-in-class, robust AI delivery to the clients and KPMG Advisory
- **Revenue & ROI:** Led client engagements generating \$15M+ in revenue, delivering critical, enterprise scale AI solutions. Delivered 18–20% ROI improvements through AI-driven business process optimization & prioritize high impact use cases.
- **LLM Cost Optimization:** Authored enterprise guidelines for open-source and commercial LLM usage, reducing token consumption costs by 12–18%. Established LLMops/MLOps standards for rapid prototyping and enterprise-scale rollouts.
- **Team Building & FDE:** Built and mentored a high-performing global matrix AI/Data team of 20+ members. Led KPMG Advisory AI upskilling programs, knowledge-sharing initiatives. Managing FDE teams, covering Financial Services business.
- **AI CoE Founder:** Founded and run Advisory AI Center of Excellence —vendor management, build vs buy, rapid prototyping/POC, framework evaluation, technical demos, and adoption of emerging AI techniques across the practice.

Technical Delivery & Agentic AI Product Development

- **End-to-End AI Product Ownership:** Own full lifecycle AI products from ideation to production (0 → 1). Created and managed reusable AI capabilities enabling scale and speed. Proactively reported risks (and proposed solutions) to Senior Partners and client CTOs/stakeholders. Act as connective tissue between business stakeholders and engineering teams.

- **Agentic AI Solutions:** Led the architecture and delivery of complex Agentic AI solutions driving measurable business value — achieving 20–25% cost-efficiency savings on average, with improved client experience, productivity, and risk management. Shipped impactful Agentic AI solutions.
- **AI-native delivery:** Drove adoption and implementing AI-native delivery within Azure hosted agentic AI ecosystem.

Signature Agentic AI & Gen AI Deliveries (Sample):

- **Agentic AI Contract IQ (Product), AI Architecture & Delivery — \$1.5M Initiative**
 - Own end-to-end delivery of Contract IQ (from discovery to Post launch phases), replacing costly vendor platform and consolidating disparate KPMG Contract systems. Enables automated ingestion of complex contracts/invoices, detecting leakage, recovering funds, and optimizing labor costs. Delivering POC in 3 days.
 - **Product Roadmap:** Created AI product roadmap based on business needs and expected outcomes (ROI).
 - **Pipeline & Tech Stack:** LLM, Agentic AI, Evals, RAG/Agentic RAG, MCP, Responsible AI, LLMops via Azure DevOps Pipeline. Embeddings, Azure Doc Intelligence, LangChain/LangGraph/LangSmith, Azure Cosmos DB + Gremlin API, Azure AI Search, React.js, Claude Code. Cloud Agnostic (end state)
 - **Impact:** \$200 million revenue opportunity; contract business automation and efficiency improvements.
 - **Time-to-value:** Tracked time-to-value for onboarding new clients – value realization improved substantially over time vs. vendor TTV. Achieved coordination with management (financials, retail, etc.), vertical teams and stakeholders.
- **Agentic AI + MCP Financial Risk Analytics**
 - Identified a new business opportunity and delivered an agentic AI solution leveraging MCP to improve financial risk numbers using bank data. Integrated AI Governance and robust evaluation frameworks.
 - **Impact:** Improved risk accuracy by 35%, operational efficiency by 55%+, and delivered \$500K in savings within 6 months.
- **RAG Content Harvesting Platform (Product)**
 - Built and shipped an advanced RAG solution with Flash re-ranker and robust evaluation mechanisms delivering business taxonomy insights and thought leadership to KPMG and clients.
 - **Impact:** 100%+ operational efficiency improvement; evolved into a product generating \$3M+ revenue over 2 years.

AI Governance, Infrastructure & Engineering

- **AI Governance:** Head AI Governance policy framework for KPMG & clients, aligned with EU AI Act and NIST AI RMF. Established governance controls such as model explainability, IP, risk and compliance. Leveraged Credo.ai to build Trusted & Responsible AI programs, lowering governance implementation costs by 15–20%.
- **LLMOps & CI/CD:** Spearheaded enterprise-scale LLMOps strategy establishing end-to-end operational excellence and agent lifecycle management using ADO pipelines, CI/CD, Docker, and AKS/ACR. Managed both open-source (Llama) and commercial models (Azure OpenAI, Google Gemini, Anthropic).
- **Azure Data Engineering:** Co-led Azure data pipeline engineering, migration to Microsoft Fabric, and data privacy management via Azure Purview, data lineage, and data quality frameworks.
- **Client Facing Applications:** Spearhead UI/UX activities for client facing applications such as Contract IQ, Fin Insights.
- **Developer Tooling:** Championed use of Claude Code for Agentic AI development. Strategized Azure AI Foundry adoption. Leveraged Microsoft Copilot for team-wide productivity enhancements. Led fine-tuning of models for domain-specific use cases. Leveraged Github Copilot for development and MS Copilot for productivity gains.

BigR.io

SVP – Data Science | Hybrid/NJ | May 2021 – July 2022

- Strategy and development of BigR.io projects and products – for BigR.io and clients. Built and led a high-performing DS team. Contributed to GTM and Pre-sales. Established the partnership with DataRobot.
- Delivered a predictive modeling for SaaS healthcare payor solution using XGBoosting (on Azure), achieving a F1 score > 0.85. Impact: Revenue stream of \$1M/year.
- Developed and delivered a binary predictive model using Random Forest technique, including feature engg. Resulted in improved prediction stability and accuracy over 30% compared to existing model.
- Ran daily project management (sprint cycle) call for tracking and management.

Credit Suisse (now UBS), Consulting

Data Scientist | NY/NY | Sep 2019 – May 2021

- Delivered enterprise scale Repo, Collateral, and Margin (RCM) trading booking system using Bi-LSTM NER Deep Learning. Achieved F1 score > 0.87. Resulted in saving over \$800K/year. Replaced rule-based trading system. Used by 20+ RCM Credit Suisse/UBS traders.
- Provided DS leadership. Build a solid 10-member DS and data team. Developed MLOps on AWS cloud.

UST

Director, Data Science | Aliso Viejo, CA/NJ | May 2018 – Sep 2019

- AI/ML Founding Director. Built and mentored a strong global data science team (US & India)
- Managed DS horizontal for UST and clients, resulting in a revenue stream of \$25M.
- Developed and managed UST Flagship product (AutoML) with a revenue base of \$40M. Built a business predictive model for financial client using LSTM. Achieved a superior F1 metric > 0.90

JP Morgan Chase

Vice President, Global Technology (GT) | NY/NY | Jan 2014 – May 2018

- Initiated ML within GT group. Developed Anomaly Detection using Deep Learning, replace rule-based engine. Developed Risk pricing ML engine using Random Forest; achieved a low MSE, employing a solid hyper-parameter optimization.
- Managed global Ref Data platform on Big Data (Hadoop). Performed Oracle fine-tuning – SQL and DB tuning. Improved Oracle SQL performance by an impressive 75%

Barclays

Vice President Risk Technology | NY/NY | July 2009 – Jan 2014

- Developed a robust ETL and database backend on Oracle Exadata platform. Support credit, IR, and liquidity risk businesses
- Hired and managed ~50 member global matrix team: US, UK, India, and Singapore

[My earlier career in Financials in Wall Street – Citi, Deutsche]

TECHNOLOGY EXPERTISE

- **AI/ML Frameworks:** LangChain, LangGraph, LangSmith, Claude Code, Credo.ai, Hugging Face, PyTorch
 - **LLMs & Models:** Azure OpenAI (GPT-4o/5), Anthropic Claude, Google Gemini, Meta Llama, VLMs, Embedding Models
 - **Cloud & Data:** Azure AI Foundry, Azure Cosmos DB, Azure AI Search, Azure Purview, Microsoft Fabric, PostgreSQL, Neo4j, FAISS
 - **DevOps & Infra:** Azure DevOps (ADO), CI/CD Pipelines, Docker, AKS (Kubernetes), GitHub, LLMops/MLOps
 - **Governance:** EU AI Act, NIST AI RMF, Credo.ai, Trusted & Responsible AI, AI Risk Management
 - **Frontend/Product:** React.js, UI/UX Design Oversight, Rapid Prototyping
-

EDUCATION

Master of Science — Computer Science (Minor: Statistics)

Rutgers University, New Brunswick, NJ

KEY DIFFERENTIATORS

- AI leader – Leadership on AI Strategy & Enablement, AI-First, AI-Native development
- Hands-on technical leader — architects, codes, and leads simultaneously
- Entrepreneurial mindset — founded AI CoE; balance innovation with business delivery
- Strong business and technical communication; documentation and vendor management excellence
- Proven track record transitioning POCs to production-grade enterprise AI products
- Financial Services domain focus with deep understanding of risk, compliance, and regulatory AI requirements
